Summary

My curiosity drives me to explore and follow the path to wonder and harmony in the world ,as my eyes marvel at every little detail somewhere along the way i started creating my own wonder

I'm an introvert with a galaxy of imagination

I'm here because I'm perusing my passion of learning new things, and making the world a better place through technology.

I've a long road ahead of me ,but I'm enjoying every moment ,and seizing every opportunity to evolve as a person as well as developing my skills
